

Parents Workshops

The purpose of *Xpanding your mind as Parent* to meet the needs of Spanish-speaking parents developing an entry-level computer literacy program. All instruction is delivered in Spanish. Our focus is to empower non-English speaking parents, and to provide them an opportunity to discover their unique skills and strengths using technology-based tools. Likewise helping them learn how to organize, improve their knowledge's abilities, and have more control of their economics areas, health, craft skills, helping their kids at home, and more.

The level of parent involvement in a child's education continues to be an important factor in the success of a child in school and beyond. Parents are encouraged to support learning at home, express expectations for achievement in school and in life, and become involved in their child's schooling. Schools can foster these connections between parents and children by implementing parent-education programs that include technology as a component of school improvement and improved student achievement strategies. *Caring about children is a shared responsibility, best accomplished when businesses, schools, parents, and communities all work together.*

EYM in Technology:

The goal for *Expanding your Mind* in technology is for parents to:

- a) Understand the impact of technology integration on schools, workplace, and the home.
- b) Learn how technology can be an effective means for enhancing communication with their children.

EYM in English

The purpose of *Expanding your Mind* in English with EASY ESL is a video-based program of 12 units, which offers a complete ESL curriculum that will take the students from absolute beginner to intermediate level. The training provides students with fundamental listening and speaking skills. Further, it helps students develop vocabulary, grammatical, and cultural understanding with a degree of fluency that will facilitate integration into the students' mainstream community - making learning interactive, fun and exciting.

EYM at Home

Learn how parents can help children to develop positive study skills and habits, improve their thinking and memory abilities, and encourage them to use time well, read independently, and take responsibility for their work... and more.
