

Innovative Educational Environment with technology in Spanish

Nuevo Entorno Educativo con Tecnología en Español

Target Population: Pre-K – K12 & Adults

Expanding your mind in Spanish is an innovative learning model that uses technology in Spanish to help instructors, students, and parents to enrich their knowledge with individualized lessons, in different areas.

Academic Path is in partnership with a recognized company located in Mexico City, with the purpose to unify our experiences with the wish to provide programs with technology as a tool to help teachers and parents providing hours of practice and entertainment to the students.

The challenge was to create programs which students believe that they play, and parents and teachers to observe what they are learning.

Every single product has been developed under strict control of content and quality. Within our products we have materials of different areas of knowledge; some of them are: matemáticas, ciencias naturales, química, ortografía, lecto-escritura, idiomas geografía historia, dictado y reconocimiento de imágenes.
